

The tablet device displays the TUC app's "Suggestions" screen. At the top right is a "Categories" dropdown and a "SUGGESTION BOX" section with a yellow sun icon and the text "TUC is a platform that enables people from all over the world bring ideas together and build something great with it.". Below this is a "TRENDING DISCUSSION" section featuring a post from @FigmaInc about the iPad Pro running Mac software. The main content area shows two posts from @FigmaInc. Both posts are titled "Figma should add offline functionality" and are categorized under "Design". They both include the same description: "More accessible to designers during emergencies". Each post has a timestamp ("Posted 2hrs ago"), a preview of the Figma interface, and interaction metrics: 4.2k likes, 800 comments, 8.3k views, a remix button, and a share button. A "View more" button is located at the bottom right of the suggestions feed.
